

NEW YORK STATE DEPARTMENT OF HEALTH
BUREAU OF COMMUNICABLE DISEASE CONTROL
REGIONAL EPIDEMIOLOGY PROGRAM

STATEWIDE INFLUENZA SURVEILLANCE REPORT
May 26, 2006

- 1. New York State Epidemiologist's Report to CDC:** For the week ending May 27, 2006, influenza activity was **sporadic**.

Definition of Influenza Activity Levels:

Activity Level	ILI¹ activity/Outbreaks		Laboratory data
No activity	Low	And	No lab-confirmed cases
Sporadic	Not increased	And	Isolated lab-confirmed cases
	OR		
	Not increased	And	Lab-confirmed outbreak in one institution ²
Local	Increased ILI in one region; ILI activity in other regions is not increased	And	Recent (within the past 3 weeks) lab evidence of influenza in region with increased ILI
	OR		
	2 or more institutional outbreaks (ILI or lab- confirmed) in one region; ILI activity in other regions is not increased	And	Recent (within the past 3 weeks) lab evidence of influenza in region with the outbreaks; virus activity is no greater than sporadic in other regions
Regional	Increased ILI in \geq two but less than half of the regions	And	Recent (within the past 3 weeks) lab confirmed influenza in the affected regions
	OR		
	Institutional outbreaks (ILI or lab confirmed) in \geq two and less than half of the regions	And	Recent (within the past 3 weeks) lab confirmed influenza in the affected regions
Widespread	Increased ILI and/or institutional outbreaks (ILI or lab confirmed) in at least half of the regions	And	Recent (within the past 3 weeks) lab confirmed influenza in the state.

¹ ILI = influenza-like illness, defined as temperature $\geq 100^{\circ}$ F with cough or sore throat in the absence of a known cause

² Institution includes nursing home, hospital, prison, school, etc.

2. Nosocomial Influenza Activity: NYSDOH has received reports of laboratory-confirmed nosocomial influenza activity as noted in the table below.

4. Sentinel provider reports:

For the week ending May 20, 2006, the percent of patient visits for influenza-like illness (ILI) for the entire state was 0.21 %, with the percent ILI in each age category as noted below.

Note: National epidemic threshold baseline as calculated by CDC is 2.2%.

Since October 1, 2005, 48 of 102 sentinel specimens tested positive for influenza at the NYSDOH Wadsworth Center Virology Laboratory.

LEGEND:

Current = one or more laboratory-confirmed influenza cases reported during the current report week.

Previous = one or more laboratory-confirmed influenza cases reported after October 1, 2005 but prior to the current report week.

No Report = no laboratory-confirmed influenza cases reported so far this season.

NOTE: The influenza reporting season begins the first week in October and ends the third week in May. This report is available on NYSDOH's Influenza website at <http://www.health.state.ny.us/nysdoh/flu/index.htm>. CDC's nationwide influenza surveillance report is available at <http://www.cdc.gov/ncidod/diseases/flu/week>
